Passionate Minds, is who we are. A smart, nimble team with complementary capabilities – Leadership who **Aspire** and reach out to the future, **Thinkers** who question the status quo, team with abilities to **Manage** projects effectively, **Engaging** and focusing on client, **Creating** value through innovation and ultimately helping clients **Succeed**. We are **ATMECS Global**

We partner with best-in-class technology

Develop Automate Sustain Innovate

ATMECS Enterprise Overview

Aspire Think Manage Engage Create Succeed

Engineering Services

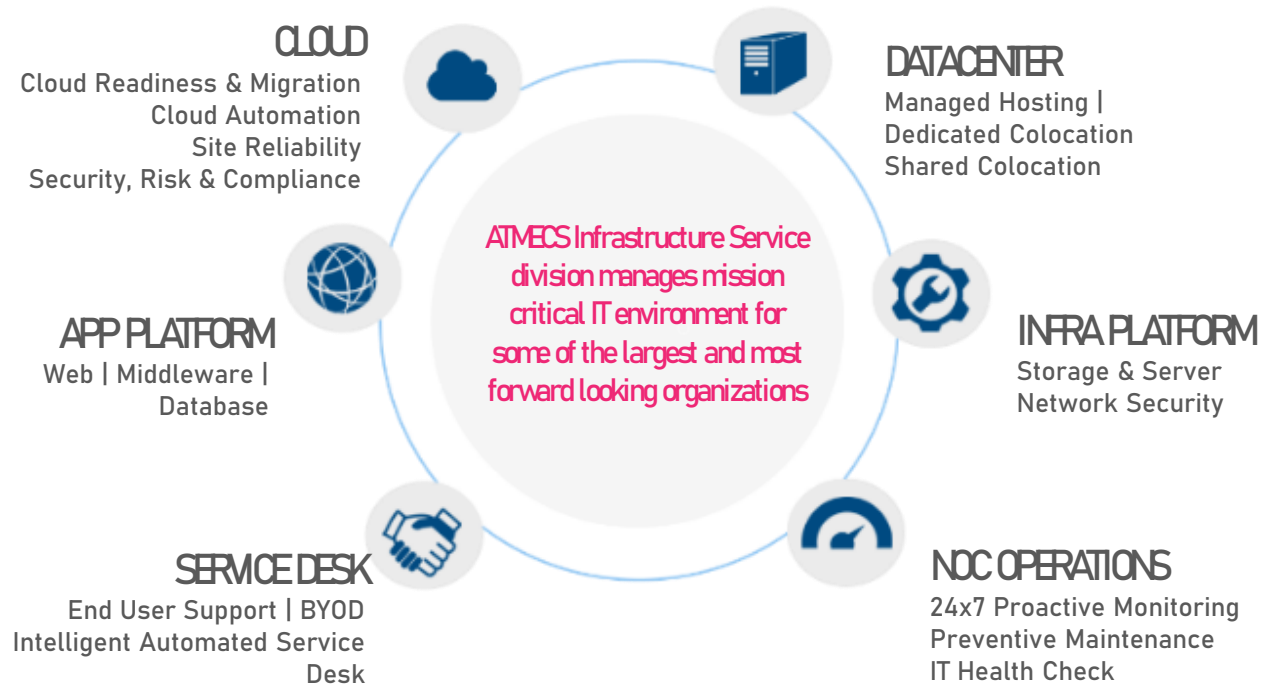

Product Engineering

- Product Design, Development & Maintenance
- Integrated Product Engineering
- Integration with Legacy Systems
- Product Reengineering

Quality Engineering

- Automation Engineering
- Performance Engineering
- Manual Testing for Automation Enablement
- API Automation

Managed Services

Next Gen Services

Digital

- Augmented, Virtual and Mixed Reality
- Block chain and Cryptocurrency
- Robotic Process Automation
- Internet of Things

Enterprise Analytics

- Advisory Consulting
- Data Engineering
- Business Intelligence
- Data Science

Mobile Computing

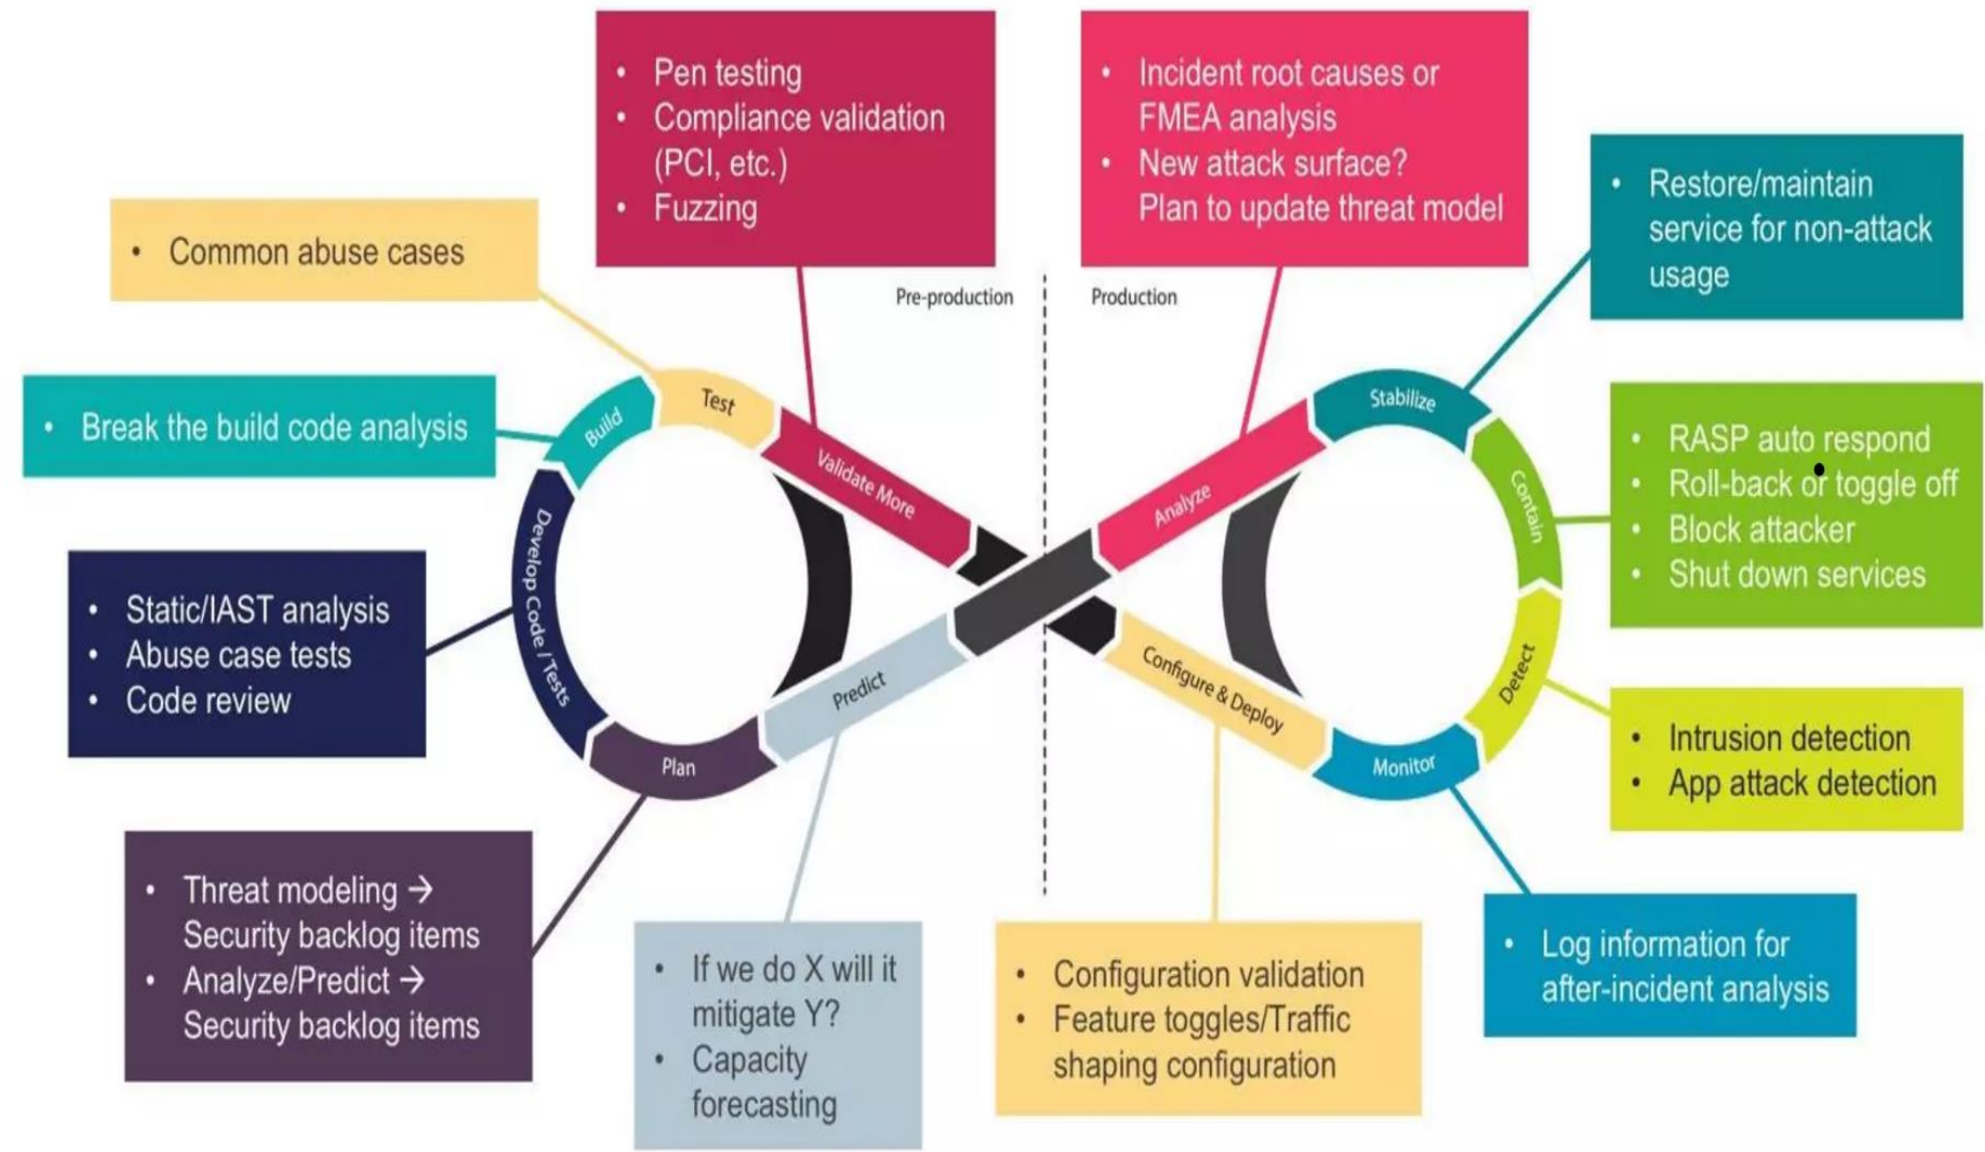

- Hybrid Mobile Application Development
- Mobile Compatible Responsive Web Portals
- Enterprise Mobile Device Management
- Mobile Web Test Automation

Trusted advisor and partner for managing and transforming large and complex environments

Cyber Security in Software Development

Security First Paradigm

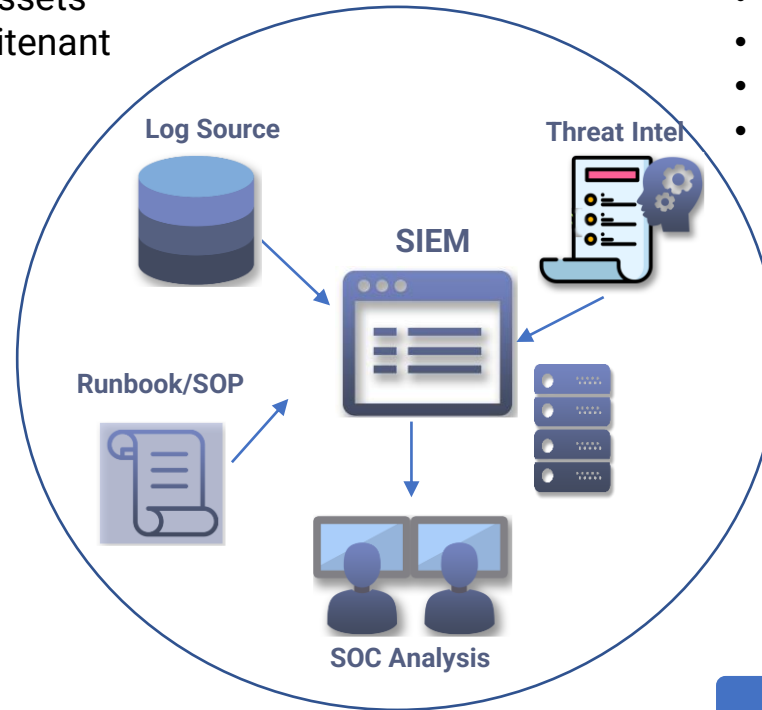

Security Information and Event Management

SIEM (CPE or Managed)

- Log collection from on premise/cloud assets
- Custom Use-case development on multitenant SIEM
- External Threat Intelligence
- On-going care and feed of SIEM

24 x 7 Monitoring

- Alert Monitoring
- Investigation of suspected events
- Alerting on true positives
- System forensic

Managed Services

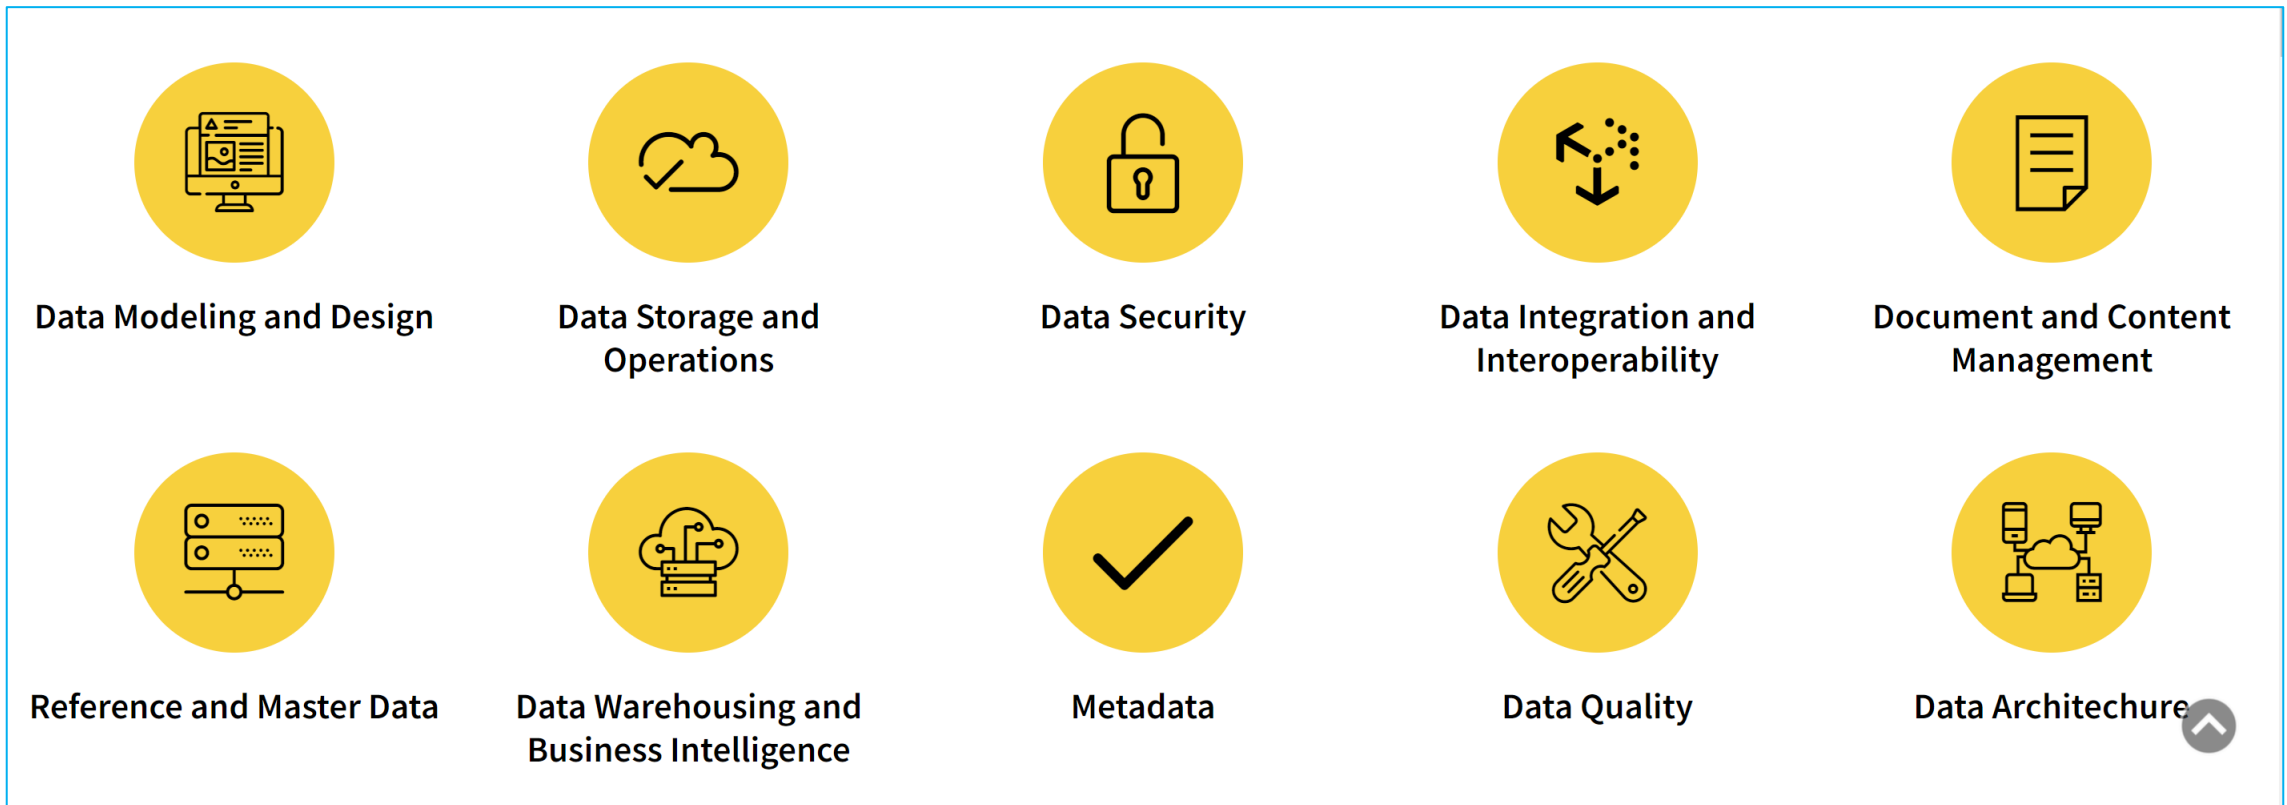

- Network Security
- Vulnerability Management
- End-Point Security
- Security Advisory and Consulting Services

Incident Response

- Threat Response Advisory
- Incident containment support
- Incidence eradication
- Recovery support

ATMECS Offers - Strong Data Foundation with the Globally-approved DAMA-DMBOK Model

At ATMECS, we use the DAMA-DMBOK (**Data Management Book of Knowledge**) model to design effective data strategies and programs for data management, optimization, and analysis. With this framework, we can optimize all these areas and make your data a key asset that supports your organizational goals:

ATMECS Tailored solutions for your unique security needs

BANKING, FINANCIAL SERVICES & INSURANCE

We collaborate with financial service providers to keep their customers' financial data safe. We support clients in Banking, Insurance, Credit Unions, FinTech, Investment Management, Private Wealth Management, Private Equity and other financial services sectors. We have a team of regulatory compliance management experts, who help mitigate cybersecurity risks at reduced costs while accelerating digital transformation.

TECHNOLOGY, MEDIA & COMMERCIAL SERVICES

We partner with Technology, Media & Commercial Service providers to quickly drive to market while securing digital technologies. Our security solutions empower our clients to create and deliver innovative products while collecting, storing and using data to gain customer insights in a secure fashion.

ENERGY & RESOURCES

We assist Energy and Utility companies in defending their critical infrastructure against sophisticated cyber-attacks. Our clients are in Oil & Gas, Power Utilities, Renewable energy and other energy sectors. We empower their security to become more resilient against threats such as Ransomware, OT/IoT security and supply chain risks.

CONSUMER PRODUCTS, RETAIL & MANUFACTURING

We protect our Retail and Manufacturing clients to secure customer data and intellectual property while limiting disruption to operations. Our extensive knowledge enables us to address security and compliance challenges such as Ransomware, IoT/IloT, smart devices security and supply chain risks.

HEALTHCARE & LIFE SCIENCES

We enable Healthcare Providers and Life Sciences clients to enhance their patients and citizens' care. Our experience in managing cybersecurity risk and compliance (HIPAA, HITRUST) across diverse, interconnected health systems enables us to protect PHI, EHR systems and confidential clinical data from modern cyberthreats and ransomware.

PUBLIC SECTOR & HIGHER EDUCATION

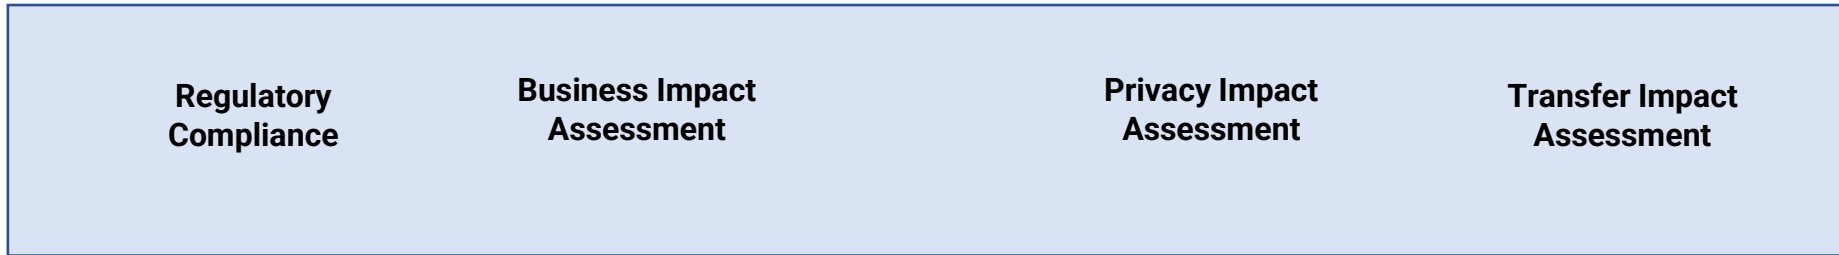

We aid Public Sector organizations and Educational institutions in protecting citizens' and students' data. Our experts secure critical infrastructure by aligning it with applicable frameworks and regulatory requirements (FISMA, FedRAMP, NIST CSF, CMMC among others) to match cybersecurity and risk management needs.
